

Marriott International Shareholder Meeting Question
Ethan Peck, Associate, Free Enterprise Project
National Center for Public Policy Research, May 6, 2022

The World Economic Forum (WEF) lists Marriott International as a partner, but Marriott doesn't disclose this spending to its shareholders. Why is Marriott willing to financially support WEF, but unwilling to be forthright about it to shareholders?

WEF openly advocates for transhumanism, abolishing private property ownership, eating bugs, social credit systems, and host of other blatantly Orwellian objectives. Do you share this dystopian vision for the future – one that Marriott shareholders are, in effect, funding? If not, are you willing to end Marriott's partnership with WEF?
