

Anti GMO Activist Claims FAIL EVERY TEST

SCIENTIFIC

✗ False

“The safety of GE crops for human consumption has not been adequately assured.”

— *Just Label It*

✓ Fact

Every independent scientific body that has ever evaluated the safety of biotech crops has found them to be **as safe as conventionally grown foods.**

— *Forbes*

ECONOMIC

✗ False

“GM crops do not increase yield potential—and in many cases decrease it.”

— *Non-GMO Project*

✓ Fact

Biotechnology helped farmers grow **311.8 million tons more food** per acre in the last 15 years.

— *Action for Ag*

LEGAL

✗ False

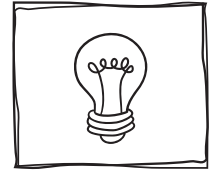

“Our government’s failure to require labeling...is an absolute breach of its responsibility to the American public.”

— *Just Label It*

✓ Fact

The required label information pertains to changes in the food’s composition or nutritional value, and the FDA has found that **genetically modified foods are of the same composition and nutritional value** as foods from comparable traditionally bred plants.

— *Food and Drug Administration*

COMMON SENSE

✗ False

“Genetic engineering is completely different from traditional breeding and carries unique risks...Current understanding of the way in which DNA works is extremely limited.”

— *Institute for Responsible Technology*

✓ Fact

Humans have been modifying plant genes for 10,000 years to develop foods that are nutritious and productive, such as cheese, bread, wine and beer.
